TYRIQUE DE BRUIN

Centurion, South Africa 060-179-4464 tyriquedebruin@gmail.com tyrique.dev GitHub

Software Engineer with full-stack experience and a backend-leaning focus. Contributing to a globally deployed enterprise platform used by international clients, working across frontend and backend systems using Laravel (Filament) and modern JavaScript. Strong in translating Figma designs into production-ready interfaces while supporting backend functionality such as multi-tenant architecture. Actively expanding into Java, Python, and C++. Hands-on with infrastructure and automation through personal projects using Terraform, Ansible, Docker, Proxmox, and LXC containers, with self-hosted services exposed via Cloudflare tunnels.

TECHNICAL CORE

Languages

PHP

Laravel

SQL

JavaScript

Svelte

Java

Python

Cloud & Infra

Docker

Azure Blob

Terrxaform

Ansible

Proxmox

LXC

Architecture

Multi-tenancy

API Integration

Web Apps

AI Integration

Systems

Linux

Cloudflare

Virtualization

WireGuard

MikroTik

PROFESSIONAL EXPERIENCE

Software Engineer

March 2024 – Present

StratuSolve (Divblox Group)

- **Project Contribution (GenSafe):** Core engineer on an AI platform delivering document intelligence and governance tooling for board members and executives, including AI-driven insights across high-volume board packs, knowledge management, and bid preparation workflows.
- **Project Contribution (SuperWorker):** Core engineer on a corporate upskilling platform where AI is trained on company-specific documents to deliver personalised employee learning experiences, serving international corporate clients including global accounting firms.

- **Framework Migration:** Contributed to a core framework migration to support multi-product workflows within a single application, reducing deployment overhead and enabling faster onboarding of new client instances.
- **JSE Integration:** Developed a real-time data pipeline for the JSE Announcements API, automating financial updates and reducing manual verification overhead for enterprise users.
- **Document Ingestion:** Implemented a high-volume document ingestion engine in PHP, improving file processing throughput via optimised database transaction management.
- **AI Integration:** Developed backend systems supporting AI-augmented workflows across a multi-tenant document platform using Azure Blob Storage.
- **Cross-Platform Delivery:** Implemented adaptive layouts using Laravel agent detection to serve optimised mobile and desktop experiences within a single codebase, packaged as a native app via Capacitor.js with PWA support.

Software Development Intern

Dec 2023 – Jan 2024

Elite X Academy (Divblox Group)

- **Workflow Automation:** Engineered a Trello-integrated automated bug reporting system for Mobi Life, reducing ticket response latency by 40%.
- **Backend Engineering:** Developed a secure PHP/MySQL backend featuring RBAC (Role-Based Access Control) and real-time tracking dashboards.

SYSTEMS RESEARCH & ENGINEERING (HOMELAB)

Demonstrating systems maturity through autonomous infrastructure management.

- **Infrastructure as Code (IaC):** Manage a personal cluster using **Terraform** and **Ansible** to automate the deployment of self-hosted services across hybrid environments.
- **Virtualization & Orchestration:** Orchestrate LXC and Docker containers on **Proxmox** hypervisors; implemented secure remote access via Cloudflare Tunnels.
- **SyncShift Ticketing:** Built and deployed a production-ready support system using PHP/MySQL, reducing manual administrative tasks by 60%.

EDUCATION & AWARDS

BSc in Software Engineering

Feb 2021 – Dec 2024

Eduvos Pretoria (GPA: 3.79/4.00 – Magna Cum Laude)

- Seriti Scholar (Academic Excellence in STEM)
- Golden Key International Honour Society (Top 15%)
